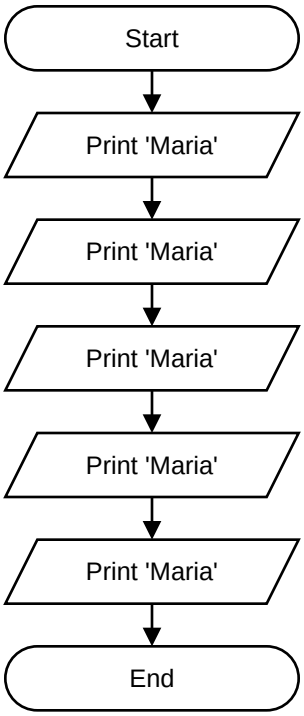
1. Print your name five times (sample name: Maria)

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

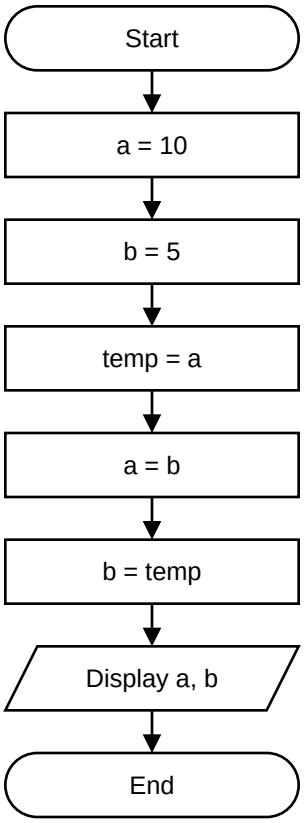


Simulation table

Step	Output
1	Maria
2	Maria
3	Maria
4	Maria
5	Maria

2. Initialize a=10, b=5, then swap

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

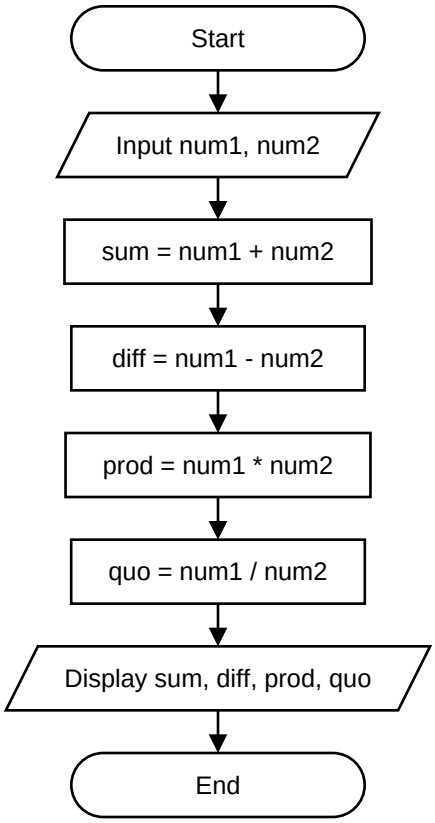


Simulation table

Step	a	b	temp
a = 10	10	-	-
b = 5	10	5	-
temp = a	10	5	10
a = b	5	5	10
b = temp	5	10	10
Display	5	10	

3. Sum, difference, product, quotient

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

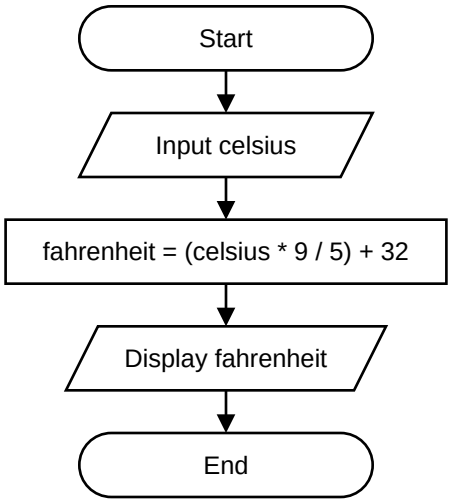


Simulation table

num1	num2	sum	diff	prod	quo
20	4	24	16	80	5
9	3	12	6	27	3

4. Celsius to Fahrenheit

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

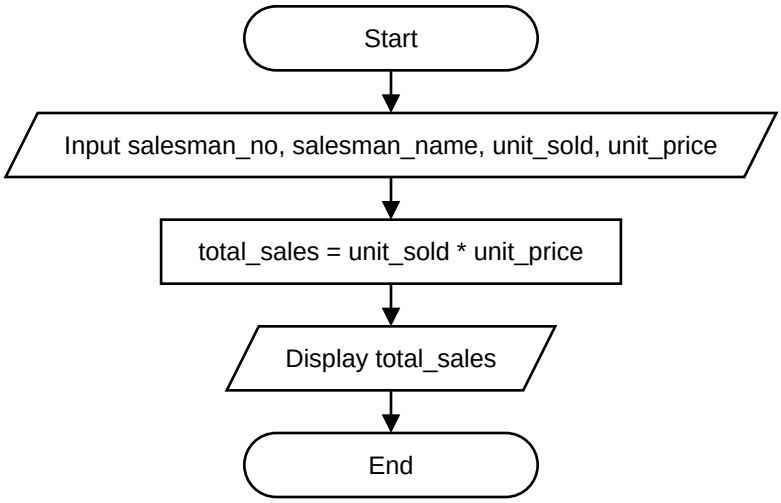


Simulation table

celsius	fahrenheit
0	32
25	77
100	212

5. Total sales

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

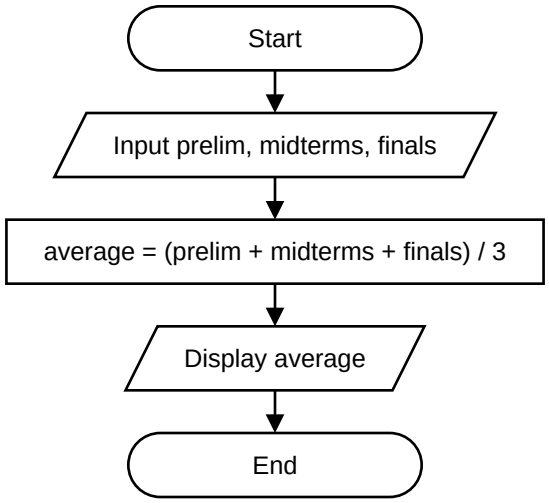


Simulation table

salesman_no	salesman_name	unit_sold	unit_price	total_sales
101	Ana	5	200	1000
102	Ben	12	50	600

6. Average of prelim, midterms, finals

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

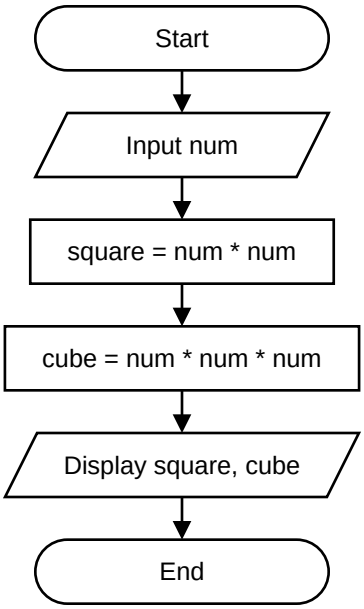


Simulation table

prelim	midterms	finals	average
80	85	90	85
70	75	86	77

7. Square and cube of a number

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

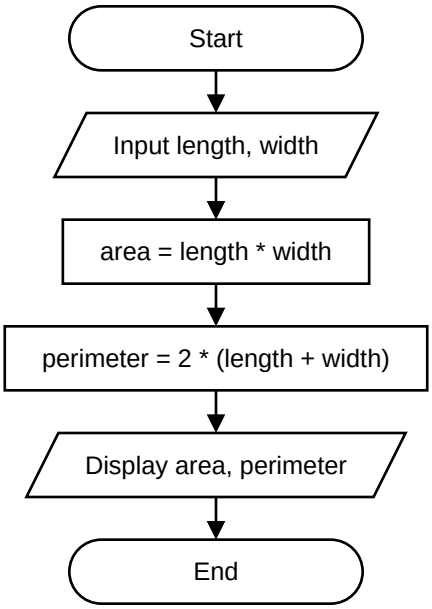


Simulation table

num	square	cube
3	9	27
5	25	125

8. Area and perimeter of a rectangle

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

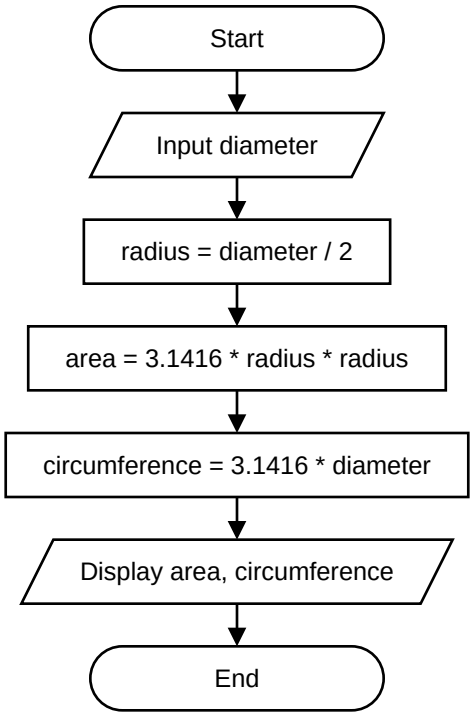


Simulation table

length	width	area	perimeter
5	3	15	16
10	4	40	28

9. Area and circumference of a circle

Oval = Start/End Parallelogram = Input/Output Rectangle = Process

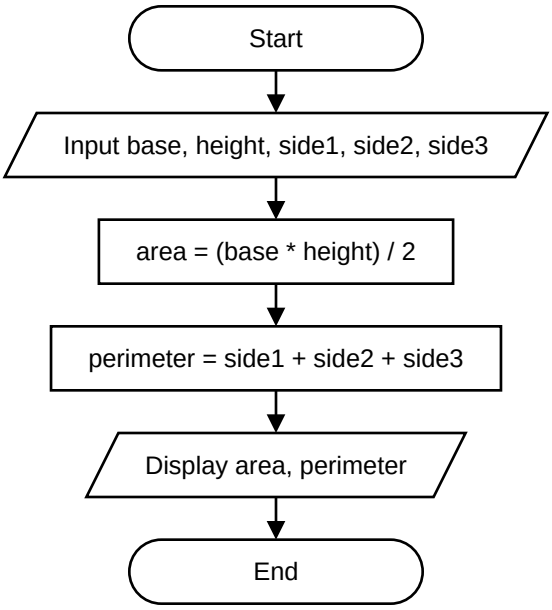


Simulation table

diameter	radius	area	circumference
10	5	78.54	31.416
4	2	12.5664	12.5664

10. Area and perimeter of a triangle

Oval = Start/End Parallelogram = Input/Output Rectangle = Process



Simulation table

base	height	side1	side2	side3	area	perimeter
6	4	5	5	6	12	16
8	3	5	5	8	12	18
